Digital Float Control System

Advanced Motor Control for Experimental Aircraft

Product Bulletin May 2025

For installation in Experimental, Amateur-Built, and Special Category aircraft only.

Innovative Controls for Experimental Aviation

The DFC System provides precision control of landing gear and rudder motors with intuitive visual feedback. Purpose-built for experimental aircraft builders who demand reliability and performance.

Simplify your aircraft systems with cutting-edge digital control technology

Key Features

Multi-Channel Flexibility

- **6 Independent Channels** - Configurable for landing gear or rudder operation
- **Customizable Settings** - Adapt to your specific aircraft configuration
- **Intuitive Controls** - Simple switch inputs for straightforward operation

Status at a Glance

- **Multi-Color LED Indicators** - Instantly see system status
- **Customizable Colors** - Match your panel's color scheme
- **Error Detection** - Quick identification of any issues

Reliability & Safety

- **Built-in Self-Test** - Verify system integrity with one-button testing
- **Intelligent Monitoring** - Prevents damage from electrical issues
- **Secure Updates** - Safe and reliable firmware updates

Perfect for Your Experimental Aircraft

- **Kit Aircraft** - Ideal for Van's, Sonex, Zenith and other popular kits
- **Amphibious Designs** - Simplify float or amphibious landing gear control
- **Custom Builds** - Flexible configuration for your unique design

The DFC system simplified my landing gear installation and gives me confidence with its clear status indicators. A must-have for experimental aircraft builders.

— John Miller, RV-10 Builder

Technical Highlights

Feature	Specification
Control Channels	6 independent channels
Power Requirements	24V DC (20-30V range), 2A max
Interface Options	UART, I2C, direct switch inputs
Dimensions	120mm x 80mm x 30mm
Temperature Range	-20°C to +70°C
Warranty	2 years standard

Easy Installation & Support

- **Simple Mounting** - Standard four-point mounting system
- **Comprehensive Documentation** - Clear installation manual
- **Builder Support** - Technical assistance throughout your project
- **Free Firmware Updates** - Ongoing improvements
